

# University Bookshop Canterbury Visual Explanations Order Form

	<p><b>Elements: A Visual Exploration of Every Atom in the Universe</b> <i>Gray, Theodore</i></p> <p>This book allows all to have access to what the symbols and two-letter Scrabble words that everyone thinks must be cheating actually mean and also where we can encounter them in everyday life. From Batteries to Toothpaste, Einsteinium to toy cars, it's truly awe-inspiring to find out how many of these elements we really know in other forms. Gray allows us to see materials in their stunning raw form and then tells us their history, discovery and where they are used.</p> <p>ISBN: 9781579128951</p>	<p><b>\$39.99</b></p> <p>Qty </p> <input type="text"/>
	<p><b>Molecules: The Elements and the Architecture of Everything</b> <i>Gray, Theodore</i></p> <p>Theodore Gray demonstrates how the elements of the periodic table combine to form the molecules that make up our world. Everything physical is made up of the elements and the infinite variety of molecules they form when they combine with each other. Gray begins with an explanation of how atoms bond to form molecules and compounds, as well as the difference between organic and inorganic chemistry. He then goes on to explore the vast array of materials molecules can create, including: soaps and solvents; goops and oils; rocks and ores; ropes and fibres; painkillers and dangerous drugs; sweeteners; perfumes and stink bombs; colours and pigments; and controversial compounds including asbestos, CFCs, and thimerosal.</p> <p>ISBN: 9780316480581</p>	<p><b>\$34.99</b></p> <p>Qty </p> <input type="text"/>
	<p><b>Solar System: A Visual Exploration of the Planets, Moons, and Other Heavenly Bodies that Orbit Our Sun</b> <i>Chown, Marcus</i></p> <p>This beautiful book presents a new and fascinating way to experience our planetary neighbourhood. With hundreds of stunning photographs and graphics, as well as fascinating text by the award-winning writer and broadcaster, Marcus Chown, <i>Solar System</i> takes us on a whirlwind tour of the planets, dwarf planets, moons and asteroids that orbit our sun. From the surface of Mars to the rings of Saturn, from the volcanoes of Io to the latest images of Pluto from NASA's New Horizons probe, <i>Solar System</i> offers a window seat from which to view the science and beauty of space.</p> <p>ISBN: 9780316268059</p>	<p><b>\$42.99</b></p> <p>Qty </p> <input type="text"/>
